

~~ VIBE CODING ~~

Programming with Intent, Not Syntax

★ Describe the goal, not the implementation

AI handles the technical details

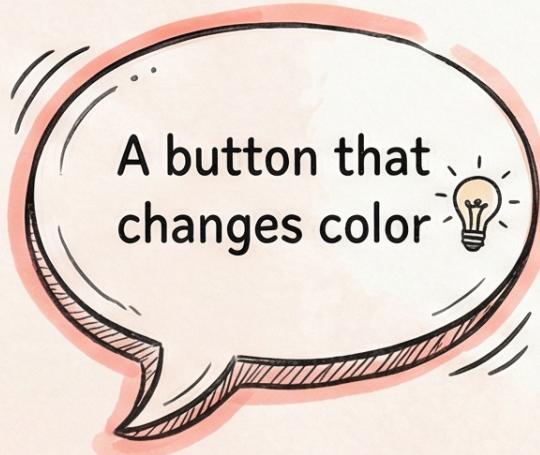

• Focus on creativity and problem-solving

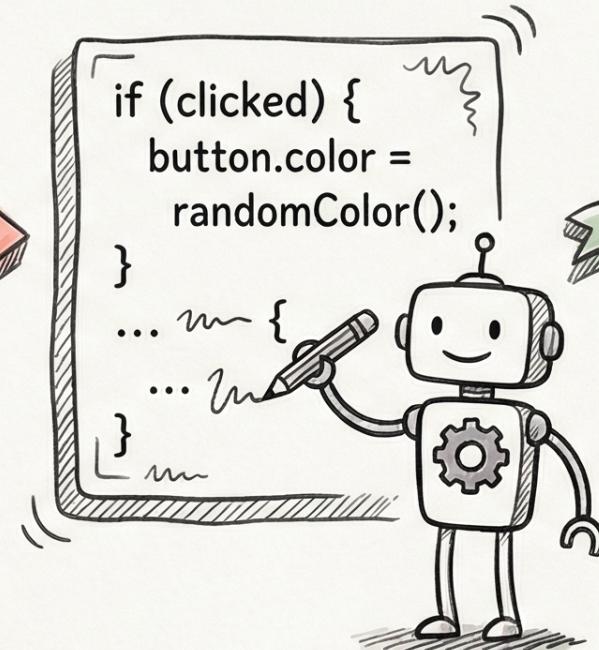

The Vibe Coding Workflow

The Core Process

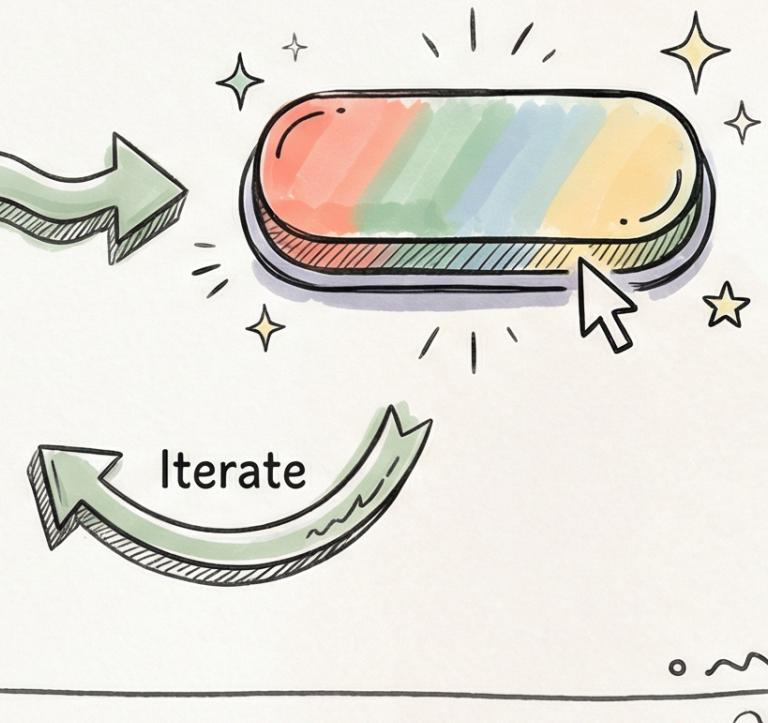

Step 1: Express your idea
in natural language

Step 2: The AI
generates the code

Step 3: Review, refine,
and iterate

Augmenting Human Creativity

Focus on high-level architecture and user experience

AI as a tireless, expert pair programmer

Build more, faster, and with greater complexity
